

eTwinning Project

For a healthier world our duty is forest

For a healthier world our duty is forest

About the project

The project is about to raise awareness about the importance of forests and afforestation. Environmental and climate issues have no longer been country-based and have become global disasters. For a sustainable life, it is very important to take steps to prevent these disasters and to heal the wounds caused by disasters.

AIMS

The main purpose of this project is to raise global awareness of the importance of trees and forests in the project participants.

EXPECTED RESULTS

the participant students will gain experience in planting, gain the skills of "teamwork" and "decision-making" as a result of acting together with their friends, and have knowledge about forest fire prevention and what can be done during disasters.
